It's built to be throttled. Cranked across two miles of lake. Leaving you with nothing but the assurance that it'll make the trip over and over again. It's a Starcraft. And when it comes to building the kinds of boats you and your family want to ride and drive, we've been first on the water since 1903.

For 95 years, we've led the way in the boating industry by continually introducing revolutionary concepts and innovative designs. Back in the teens, when other boat makers were still building boats out of wood, we made them out of metal. Twenty years later, we hopped the wake and were the first to make a

- 1903: Star Tank Company opened its doors
- 1920: Produced first metal rowboat
- 1940: Introduced galvanized steel rowboat
- 1950: Introduced first gull-wing hull design
- 1952: First boat company to successfully market the "Aluminum Tub"
- 1961: Introduced first aluminum I/O and outboard overnight big water boat called the Chieftain
- 1990: Introduced automotive-style torsion beam construction with reverse chine hull
- 1998: Introduced first 20', 102" beam aluminum fishing boat called the Pro-Elite

rowboat from galvanized steel. In the early fifties, we were the first to successfully market an aluminum fishing boat known affectionately as "the tub." And more recently, we swam up stream once again to utilize a new manufacturing process that made aluminum stronger than steel. You see at Starcraft Marine, we'll do just about anything to make our boats better. And it shows. In fact, *Outdoor Life* magazine calls our Superfisherman one of the "top multispecies boats in its class." While *Boating Life* magazine proclaims, "Starcraft's new 2010 LX epitomizes the family runabout." As you can see, we're more than just the first on the water. After all, how many other boating companies can you find in history books, see touted in newspapers and magazines as an innovative, major player for nearly a century, and still be family owned? That's an accomplishment we're pretty proud of.

**merCruiser**  
STERNDRIVES & INBOARDS

With decades of engineering leadership, dozens of performance records, hundreds of racing trophies and millions of satisfied customers, Mercury Marine products reflect a heritage of quality, performance and dependability that's the envy of the industry and why we offer Mercury Marine propulsion exclusively on all our boats.

BEFORE YOU  
GO OUT THERE, YOU BETTER KNOW  
WHERE YOU CAME FROM.

But at Starcraft, it's about more than just being revolutionary, earning distinctions and catching the good reviews. It's also about snagging the hearts of generations of boaters. It's about becoming a part of some family's heritage. If you tool around a lake and mention the name Starcraft, you're likely to hear someone recall the trusty utility their grandfather fished out of 50 years ago. Or the old 19' outboard dad would trailer up to the lake on weekends. It seems Starcraft has been woven into an American legacy of water and families for generations.

But the past is past. The true measure of a boat maker is its vision for the future. What it will put on the water tomorrow. Unique hulls. Revolutionary technology. Essential ergonomics. At Starcraft Marine, we're always looking ahead, continuing to research better ways to design, develop and manufacture the quickest, driest, most convenient boats. That's what we're already working on for next year, and the year after that. It's our mission. And we're taking it to the next century. So strap on your life vest. Hang on. And enjoy the ride on an industry leader.

# BEFORE THE THEY TAKE A HARD LOOK AT

## Paint Process

## Arc Plasma Cutter

Our state-of-the-art cutting process incorporates the latest in technology to cut raw aluminum precisely and efficiently, ensuring every Starcraft hull meets our exacting quality standards.

## WARRANTIES

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up that level of quality construction. Starcraft warrants each Pro-Elite hull for 15 years, and every other aluminum hull for ten years. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

## Transom/Bow End Caps

Anodized to eliminate oxidation and discoloration and improve exterior finish.

Over the past 95 years, you could say we've evolved with the fish. And in many cases, on account of them. After all, like you, we're avid anglers who love the water. That's why we've built a family of boats designed to get you out there to boat the bass, fish the flats, or do whatever it is you like to do.

You see, when it comes to designing and building a high performance fishing boat, we're always looking for ways to make improvements, to make our boats more innovative, better. Even if that means designing unique features in places you can't see, like below the deck. For example, all along the deck floor, under the carpet, you'll find washers on every bolt. This reduces the likelihood of the bolts tearing through the flooring or lining. Chances are you never even knew they were there. And out here on the

sides of our boats, you won't find a single drain fitting. It's simple, we run all the drains to the stem to reduce the chance they'll get knocked off in shallow water, as well as eliminate ugly sludge stains.

Yeah, one time around a Starcraft and we think you'll agree we're just plain crazy about boats. In fact, on a normal Saturday morning, you're as likely to find our design engineers re-testing a new livewell system here in the shop as you are to spot them slow-rolling a crankbait across a rocky creek channel. Because around here, fishing is more than a job, it's a lifestyle. And odds are, you share that passion for the fishing experience, which is probably what led you to Starcraft in the first place. We've made a living on the water. So let us show you around panfish alley, lunker's lair and pike's path.

# PROS GO OUT, THE STRUCTURE AROUND THEM.

## Marine Grade Aluminum

Our 5052 H32 marine grade aluminum alloy provides the greatest tensile strength and corrosion resistance.

## Double Riveting

Ensures a tighter seal and increases strength and structural integrity of the hull.

## Exclusive Power-Trac Hull® with Torsion Beam Construction

Our Torsion Beam Construction (TBC) stringer system is a pre-assembled structure of longitudinal aluminum extrusions joined together by a series of transverse bulkheads. TBC is stronger and lighter than competitive stringers and allows for a consistent and safer V-hull (competitors use flat I-beams which create a wetter ride and also limit longitudinal strength in the bow). Unlike other boats that are installed in three pieces (ribs, bulkheads and stringers), our boats are built entirely as a single unit, separate from the construction of the hull. And by attaching the TBC directly to the hull skin, we create an integral unit with a cleaner and smoother running surface on which to run the boat. And because of the superior torsional strength — a combination of strength and flexibility — TBC dissipates the impact of pounding waves along the entire length of the boat, providing exceptional shock absorption from stern to stern.

## Injected Foam

Foam is injected, not poured, between the hull stringers and the deck, which fills all air pockets to prevent water from leaking in, increases hull strength and decreases noise and vibration.

## Full-length Reverse Chine

Working in conjunction with the TBC is a full-length reverse chine hull. While our competitors use only a partial chine hull, we run ours the entire length of the boat to increase performance characteristics. By pushing the water down and away, our boats have a better running surface and are quicker on plane and much drier. Plus, they really grab the water through the turns. In addition, it provides exceptional handling and stability in almost any kind of water.

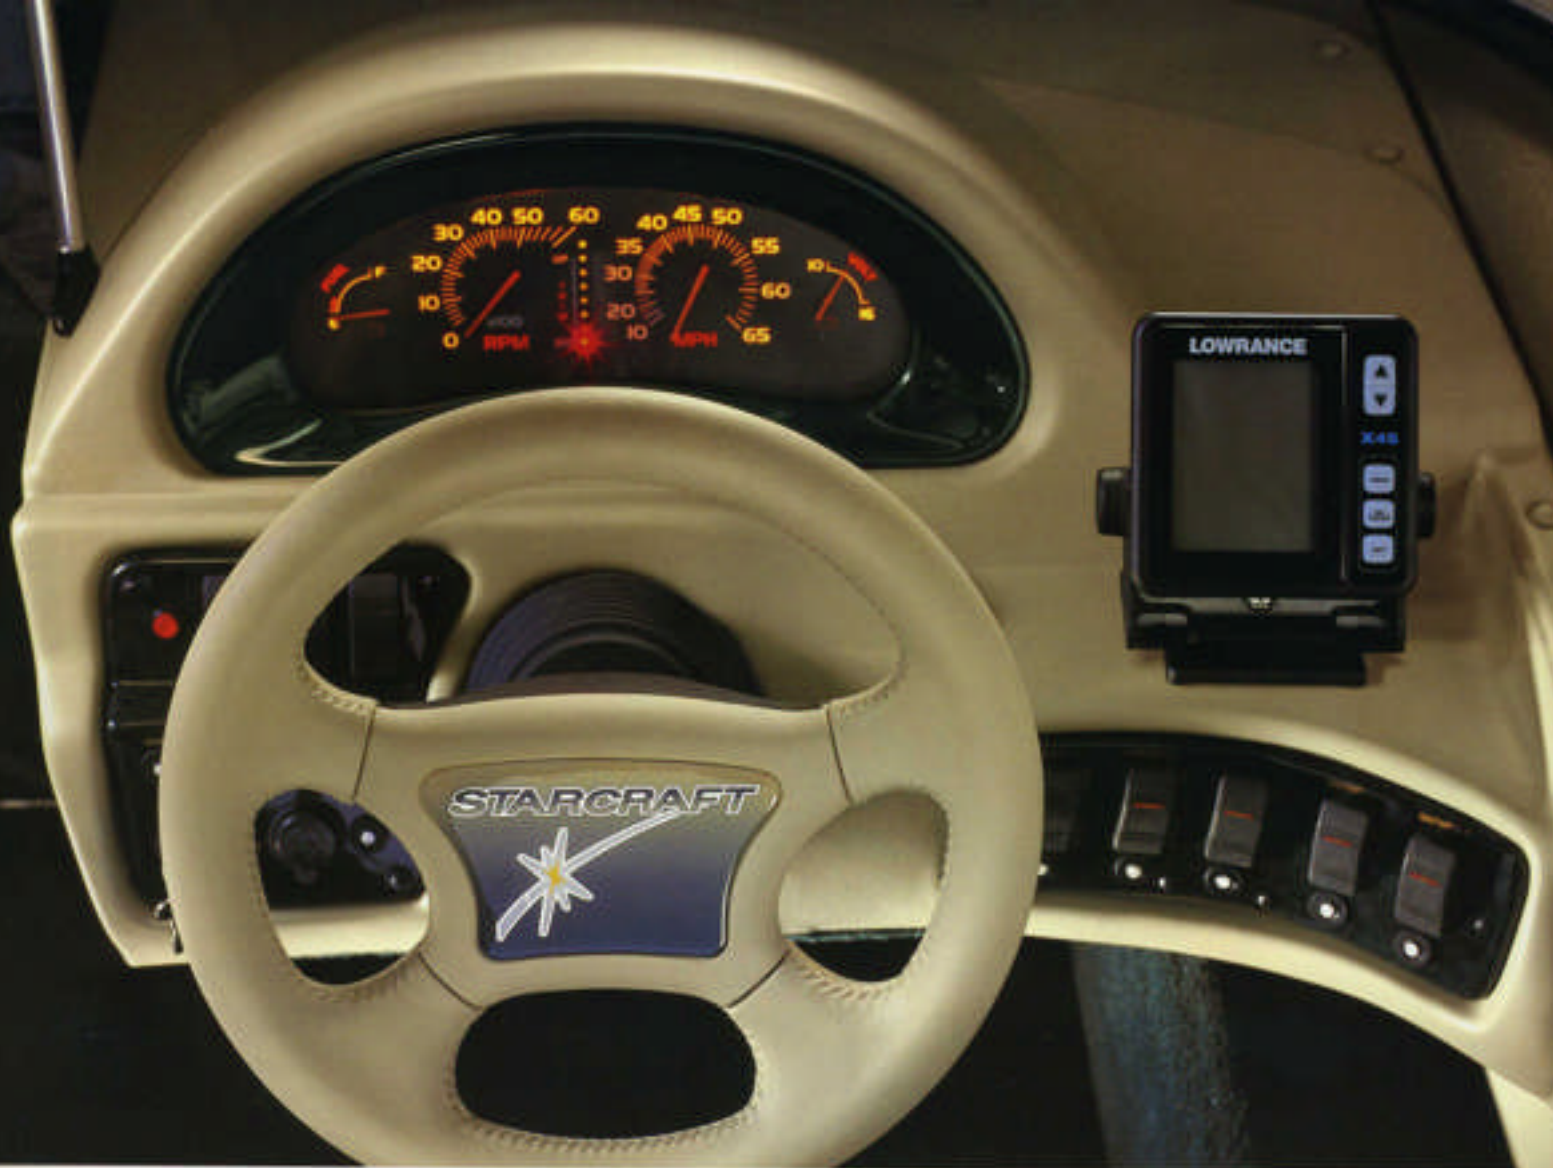

Two-Ply Aluminum

Machine-Formed Rib

Our construction process combines our exclusive Power-Trac Hull with TBC stringer System and these unique machine formed ribs to produce a hull that's stronger and lighter than our competitors who simply add an extra

layer of aluminum. This type of hull construction lacks the shock absorbing combination of strength and flexibility of our Power-Trac Hull, and is more prone to cracking and collapsing in rough water.

## IT'S WHAT'S ON THE INSIDE THAT COUNTS.

At Starcraft, we incorporate all kinds of unique features into our boats to make life out on the water easier, more comfortable. But don't just take our word for it. Step up and take a look around the cockpit, bow and transom, and see for yourself how we're different from our competitors.

### The Old Man and the Sea

Merle Graybill. Seasoned veteran. Expert boatbuilder. In 42 years, he's changed the industry with his unique designs, led our engineering family to build the best boats on the water, and is going to lead us into the 21st century.

### StarGrip®

This non-skid poly-coating increases the durability and functionality of the gunwale decks.

### Bow Command Center

Up front, you still have control over the boat. This command center contains engine trim switch, livewell/baitwell fill switches, plug-ins for the trolling motor and battery charger, as well as a 12-V accessory plug and lockable electronics storage.

### New for 1999 NexGEN® Instrument Panel

These stylish gauges are ergonomically designed to optimize ease-of-use by allowing you to view instruments over the top of the wheel rather than through it. It also allows you the freedom to add additional gauges without sacrificing its sleek appearance. It's unique for the aluminum market and comes with a 3-year warranty.

### New for 1999 EZ-Loader Trailer

For easy loading, unloading and trailering, Starcraft boats feature quality built EZ-Loader trailers, and many feature Goodyear Radial Tires.

### Full-length Cockpit Toe Kick

To help you pull in your catch, the Pro-Elite, Islander 2000/2001, Superfisherman and Fishmaster Series feature revolutionary toe kicks that allow you to step all the way up to the gunwale without having to lean over. Standing safely provides additional support and increases your comfort.

**New for 1999  
Pinchless Ergo  
Dynamic Seats with  
Power Pedestal**

These new pinchless seats feature no visible hardware and are the only of its kind in the aluminum boating industry. They turn in a smaller radius and are ergonomically designed to provide additional lumbar support. Power Pedestals are also available and may be adjusted between 13" and 17". In addition, all Starcraft models meet H-31 seat hardware requirements.

**TechWell 2000®  
Livewell System**

The Pro-Elite and Citori TechWell 2000 livewell system is the only way to keep your catch healthy. Whether you're still out roaming the shallow shoals for more walleye or trailering your boat and catch home for the evening, the TechWell 2000 is the ultimate chamber of life. With its premium three-position automatic Flow-Rite®

control valve, you can choose how you want to keep your fish fresh (see diagram at right). And as for night fishing, you'll find the waterproof light helpful in locating and transferring your catch.

**Product  
Development  
Team**  
Left to right:  
Dave Walczek,  
Marshall Boyer,  
Ernie Harrell and  
Don Shatzman, Jr.

**Air Intake Valve**

Pulls oxygen into water as it fills and recirculates.

**Roto-cast Livewell with Radius Corners**

Roto-casting is a process which creates a hollow, lightweight component by spinning plastic powder in a heated mold. It's more durable and easier to clean than aluminum and reduces gross weight of the boat. This roto-cast livewell, with its radius corners, reduces the risk of the fish harming themselves in the corners of the well.

**Aeration Tube**

Aeration occurs at the bottom of the livewell, which circulates oxygen evenly throughout the livewell, expelling ammonia and making the fish less aggressive. In competitive livewells, aeration occurs high in the tank, causing surface spray where fish gather and become more agitated — increasing the likelihood of injuring the fish.

**Flush Out Drain**

Allows you to quickly and easily remove all the debris that accumulates in the catch basin — without running it through the pump.

**Premium Three-Position Automatic Control Valve**

Whether you're on plane, off plane, or trailering your boat, the Flow-Rite control valve allows you to fill, recirculate and drain water from a single control.

- Position 1:** In the AUTO position, the aerator pump is turned on and when the boat is off plane, fresh water is constantly blended with recirculated livewell water. When your boat is on plane, the control valve will automatically close the transom port to prevent water loss and the aerator pump is automatically diverted to closed recirculation duty. When the boat is brought off plane, the valve will automatically open the transom port again to allow fresh oxygenated water back into the livewell.
- Position 2:** In the RECIRC position, the outside water is prevented from entering the livewell, while the control valve continues to allow the pump to recirculate and aerate the water. This is ideal for times when the outside water is undesirable, like when you're refueling dockside or drifting through stagnant water.
- Position 3:** In the EMPTY position, the control valve allows the water to exit the transom drain without allowing water to re-enter. This check feature is ideal for tournament anglers since they don't have to remember to close a livewell drain prior to launching as the control is already in the EMPTY position. Water will automatically be prevented from entering the livewell as the boat is backed into the water, so the boat isn't required to shoot out of the hole with hundreds of pounds of unwanted water in the livewell.

**On-board Battery  
Charger**

The Pro-Elite features an on-board dual battery charger so you won't ever be left without enough power to get you home.

## Pro-Elite Series

If you're looking for a boat that's specially built for the serious fisherman, then consider the Pro-Elite your only friend in the water. According to one of our engineers, "I've never seen a wider 20' boat. Its 102" beam gives fishermen more room and a smoother ride. It's as wide as a boat can be and still be trailerable." Consider its revolutionary NexGen instrument panel, new pinchless seats with power pedestals, bow electronic command center with on-board dual battery charger and StarGrip Euro Coat Side decks, and you'll be

in fish heaven. Finally, to ensure you're fully equipped to handle the fish, the Pro-Elite is outfitted with an illuminated TechWell 2000 Livewell System and Flow-Rite® valves, with insulated lid, a roto-cast, aerated baitwell, and full-length cockpit toe kicks ergonomically designed to make fishing easier.

TechWell 2000 illuminated, aerated livewell

In-floor storage with easy access to livewell plumbing for trouble-free maintenance

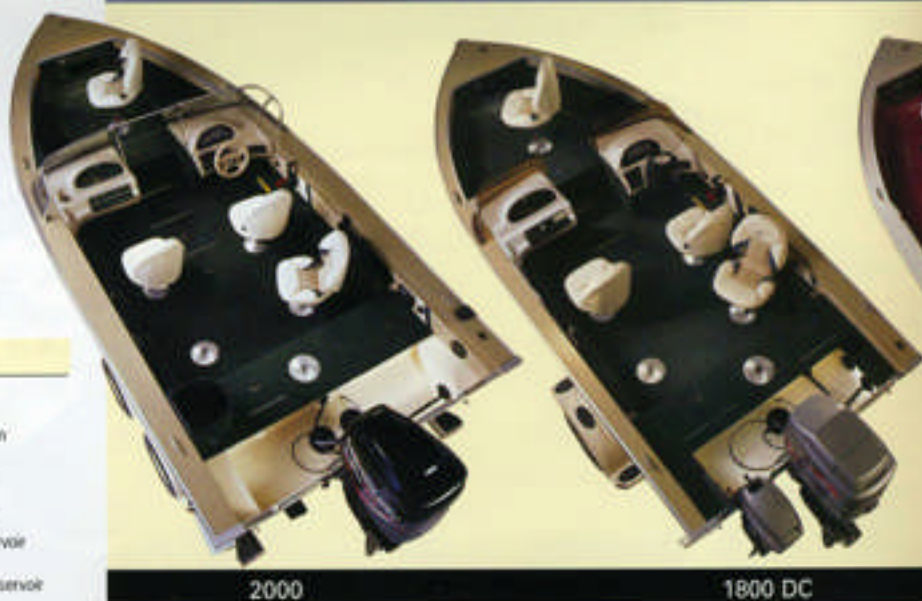

### Standard Features

#### Hull Construction

- Power-Trac Hull with Torsion Beam Construction
- 3 Battery Holders
- Stainless Steel Bow & Stern Eyes
- 4 Mooring Cleats
- 54 Gallon Fuel Tank w/Dual Vents and 5 Gallon Fuel Safety Reserve (2000)
- 37 Gallon Fuel Tank with Safety Reserve
- Internally Vented Fuel Fill
- Stepped Transmission for Kicker Motor
- 3/4" 7-Ply Pressure Treated Floor & Deck
- Marine Grade 16 oz. Carpet
- Marine Grade 5052 Aluminum
- Marine Grade Vinyl
- Vinyl Rub Rail
- StarGrip Gunwale Decks
- Limited Lifetime Deck Warranty
- 15 Year Pro-Rated Hull Warranty
- Meets or Exceeds U.S. Coast Guard Requirements

#### Cockpit

- 4 pinchless Ergo Dynamic seats and Composite Frames
- 1 Fixed Power Pedestal
- 3 Air Ride Pedestals
- 4 Seat Bases (1800 T)

5 Seat Bases (1800 SC, DC, 2000 DC)

Elevated Bow Casting Deck w/ Lockable Storage

Elevated Aft Fishing Position w/Storage

Port & Starboard 8' Rod Storage (2000)

Port & Starboard 76" Accessory Storage (1800 T, SC, DC)

Port & Starboard Console Storage (1800 DC, 2000 DC)

Starboard Console Storage (1800 SC)

## Citori Series

If you want walleye, you already know where to look. You just need the right boat to get you out where you can troll plugs along the shallow shoals. As an official sponsor of the North American Walleye Anglers, the Citori series has been specially designed with the walleye fisherman in mind. With ample storage and an open cockpit layout, you have plenty of room to maneuver around the boat battling the frosty-eyed fighters. The hull's soft ride helps ensure passenger safety, durability, as well as keeps your catch alive while running in rough water. And with its full-length maintenance-free liner, you've got an easy clean-up job when it's all said and done. And if that's not enough, consider the revolutionary NexGen instrument panel, step pad high performance hull, bow rod storage, and TechWell 2000, illuminated livewell system with Flow-Rite® valves. If you want a walleye, you'll want a Citori.

## Islander Series

The overnighter. The open-water adventurer. The leave-them-all-behind-I-want-to-be-alone cruiser. Whatever you're looking for out there, the Islander is designed to make sure you search in comfort and class. With its new Power-Trac Hull (2000, 2001), we've optimized performance characteristics and created a much drier ride. The Islander features a large, deep and roomy fishing cockpit, a NexGen instrument gauge cluster (2000, 2001), overnight cabin V-berth, a low maintenance vinyl cockpit floor, and Torsion

Beam Construction to handle six-foot breakers. Plus, it's light enough to still be easily trailered from lake to lake. When you're going to go all night, make sure you go there in an Islander.

## Expedition Center Console Series

40 miles out and it's just you and mother ocean. Sometimes the sun shines. Sometimes it doesn't. The wind can blow like a friend or snarling enemy. And the temperature can swing 80° depending on where and when you head out. That's the reality of saltwater fishing. That's why you keep going out. It's also why you need a boat that's designed to protect you from brutal elements and help you land your trophies. The Expedition, with its deep self-bailing hull and all-composite integrated fiberglass stringer construction, is built to take a beating, while its standard full-length cockpit bolsters and thru-bolted stainless steel 1" bow rail increase its durability. Consider its optional T-top with rocket launchers (shown at right), insulated fish boxes, chrome-plated bronze thru-hull fittings for added durability and good looks, as well as an aggressive cockpit depth for occupant safety. Not to mention stainless steel rod holders and stern cleats with Hawse pipes to eliminate on-deck obstructions, and stainless steel fittings and bimini top frame that can only be found as options on the competitor's high-line models. You'll know that if you're going to go out there, you'll want to be in an Expedition.

Twin engines with counter rotating props and hydraulic steering

Fiberglass center console with side and rear access

Leaning post with dual action seat and cooler (2280)

Insulated bow fish box

Ample side, open rod storage to accommodate big water tackle

Porta Potti® with bow seat

2280

- Boarding Ladder w/Platform
- Painted Trailer Exchange
- Hydraulic Steering

## Expedition Walk-Around Series

Let's face it. You don't always find the fish 800 yards off-shore. Sometimes, not even eight miles. That's why you need a boat designed to handle the pounding waves and stormy seas. With the Expedition's V-berth and galley, featuring a dinette table, wrap-around seating, sink and Porta Potti®, you'll be set for a weekend getaway. And its deep self-baling hulls and all-composite integrated fiberglass stringer construction are designed to cradle you in protection. It's also equipped with the kind of standard features that make it safe and convenient. Consider its deep and wide aisles designed for safe maneuvering around the boat, raw water washdown, a bow seat, two insulated in-floor fish boxes, insulated baitwell, and chrome-plated bronze thru-hull fittings for added durability and good looks. Check out the standard full-length cockpit bolsters and thru-bolted stainless steel 1" bow rails, as well as an aggressive cockpit depth for occupant safety, stainless steel rod holders and stern cleats with Hawse pipes to eliminate on-deck obstructions, and stainless steel fittings and bimini top frame that can only be found on the competitor's high-line models. You'll discover the Expedition is the only way to walk-around on water.

Command helm with courtesy lights, stainless steel steering wheel with padded grip and roto-cast captain's chair

Topside cockpit with standard cockpit bolsters, two swivel seats, and a sliding helm seat (also shown, standard 1" bow rails for increased strength and support)

Standard insulated in-floor 148 qt. fish box

Color matched bimini top and boot with stainless steel supports

Rear deck with hawse pipes for rear cleats to eliminate any on-deck obstructions, an insulated baitwell with composite cutting board lid, and stainless steel rod holders

V-Berth

# Superfisherman Series

You want to catch fish. They want to swim with them. Is it possible to get the best of both? Sure. This Superfisherman has been specially designed with the kind of features that make fishing better, as well as optional packages that will make the whole family happy. Consider its revolutionary NexGen Instrument panel, new pinchless seats, dual battery storage under consoles, top loading rod box and full-length cockpit toe kicks ergonomically designed to make fishing easier. The Superfisherman is designed with more usable storage areas than any other boat its size. On the flip side,

our Family Package includes a back-to-back sleeper and bow cushions for sun lounging, as well as a swimming ladder to get you and your kids in and out of the water safely.

Deluxe dash and console with standard depth finder

7' locking rod box

Bow command center

Illuminated, aerated livewell

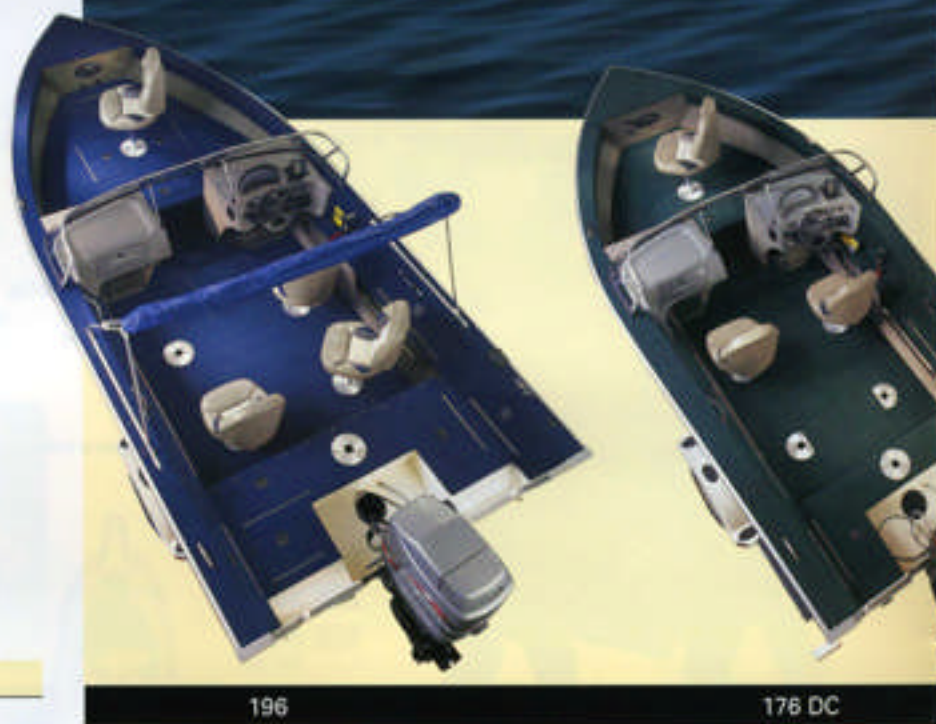

Starboard built-in tackle storage

## Fishmaster Series

Sometimes you've got to go out past the breakers to fight the lunkers. There's no way around it. So to make deep water fishing safer, the Fishmaster Series has been designed by big water fishermen with features like an aft cockpit wall to keep the big water out of the boat, as well as an all-vinyl deck/cockpit for easy maintenance — you can flush out the deck with a hose. In addition to its deep water splashwell design and aft baitwell, you'll enjoy a revolutionary NexGen instrument panel and full-length cockpit toe kicks ergonomically designed to make pulling the big ones in easier. Step up to a Fishmaster and get out there.

Deluxe dash and console with standard depth finder

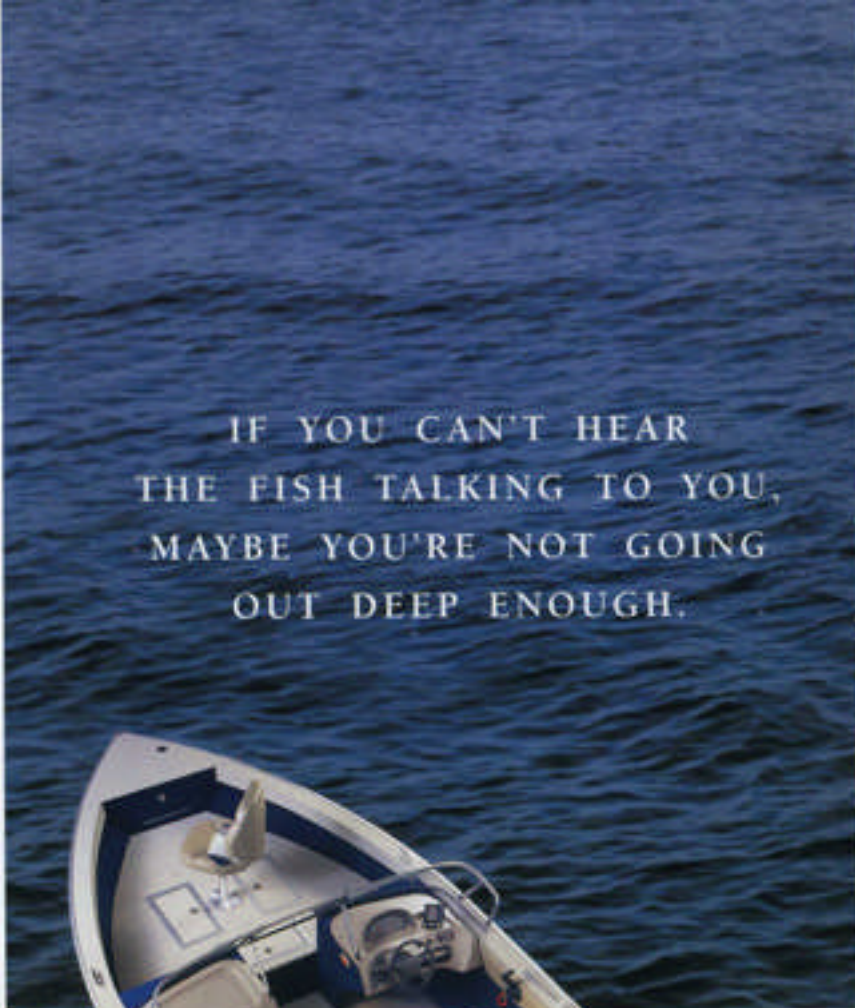

Ergonomically designed full-length cockpit toe kick

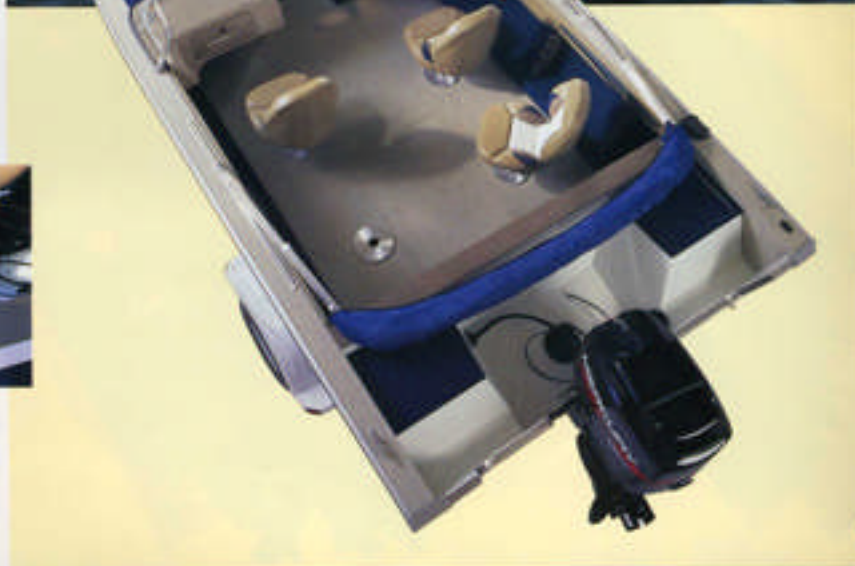

Aerated baitwell

Large motorwell for big water fishing

IF YOU CAN'T HEAR  
THE FISH TALKING TO YOU,  
MAYBE YOU'RE NOT GOING  
OUT DEEP ENOUGH.

## Starfire Series

170 LE

"Make a slow vertical, jigging presentation." "Try a cast-and-drift sweeping approach." "Flip and pitch under low hanging brush." For those of you who are sick of all the advice you get out on the open water, may we suggest just one more thing: buy your own boat and leave them all behind. The Starfire series has been designed to get you out on the water in style, not to mention within your budget. Consider its Power-Trac Hull which improves performance characteristics with lower horsepower, a vinyl cockpit floor for easy maintenance, deluxe 2-color paint and graphics, a maintenance-free gunwale, and no fittings on the sides of the boat to leave unsightly sludge stains. The bottom line? The Starfire can get you to wherever you want to fish.

## Starcaster Series

Attack a flat. Strike in the calm water. Suspend under a warming sun. The pros make it look so easy. The Starcaster Series has been built to help you become a better angler. A teller of taller tales. Consider its revolutionary NexGen Instrument panel, a fiberglass console base, new ergonomic seats and benches, dual console and center bow rod box (1860), as well as a tackle box (1860) and dry storage under the bench. A couple passes up and down the lake chasing the bass, and you'll be thankful you chose a boat that was designed to help you land the lunker largemouth.

Locking rod box

Custom deluxe ABS dash panel with fiberglass base and standard depth finder

Helm and buddy bench with dry storage

16.5 gallon illuminated, aerated livewell

In-floor tackle storage

YOU TELL THEM YOU'RE NOT

**Hand-Laid Fiberglass Construction Process**

High-grade luster, buff gelcoat, with 20 Mil net gauges, sprayed to provide maximum blister resistance and UV protection

First layer of multidirectional handlaid fiberglass called the "skin coat" applied

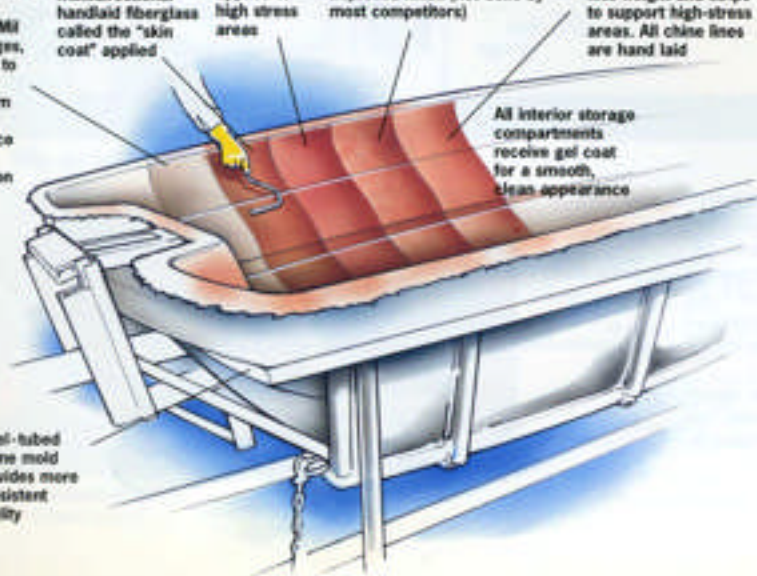

Bi-lateral fiberglass applied to high stress areas

Spraycore® barrier coat, with 80 mil thickness, applied to the sidewalls allowing more strength and rigidity with less weight, eliminating hot spots during lamination for an improved finish (not done by most competitors)

Second thick layer of fiberglass woven roving applied — up to eight layers of 24 oz. mat fiberglass — add balsa wood for strength and less weight and strips to support high-stress areas. All chine lines are hand laid

All interior storage compartments receive gel coat for a smooth, clean appearance

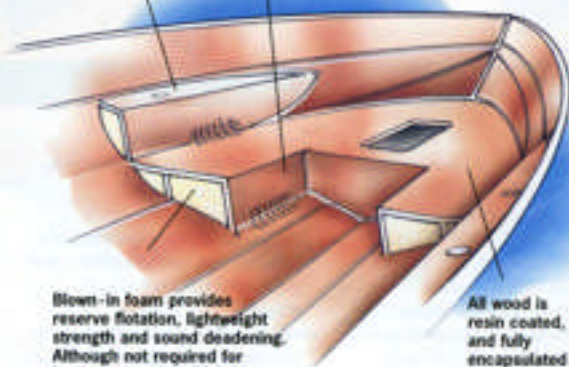

Steel-tubed frame mold provides more consistent quality

**There's Strength in Our Construction**

Blown-in Foam Coring

All floors are tied in with 24oz. fiberglass

Blown-in foam provides reserve flotation, lightweight strength and sound deadening. Although not required for boats longer than 20 feet, we use it in all of our boats

All wood is resin coated, and fully encapsulated in fiberglass roving to lock out moisture

# GOING TO BUY A BOAT THIS YEAR.

Could you disappoint these faces? When it comes to having family fun, we know what we're doing. After 95 years on the water, we've learned there's nothing quite like the feeling of screaming across a perfect wake at 25 feet off. At Starcraft, we've learned it because we've lived it. We've grown up on lakes and oceans. And we've studied water to understand how to make a glass boat perform in all kinds of conditions.

So whether you're chasing tarpon through the Florida Keys or running slalom courses down the Mississippi, you can be sure you're in the right boat. After all, it's been engineered to take a beating.

Why is it so tough? Maybe it's because we use 24-ounce woven fiberglass instead of the 18-ounce woven sheet like the others. Perhaps it's the result of our six-inch overlap versus their one-inch overlap. Or maybe, it's because we build our

boats around steel-tubed frame molds to increase strength and decrease the likelihood of the boat becoming warped or disfigured

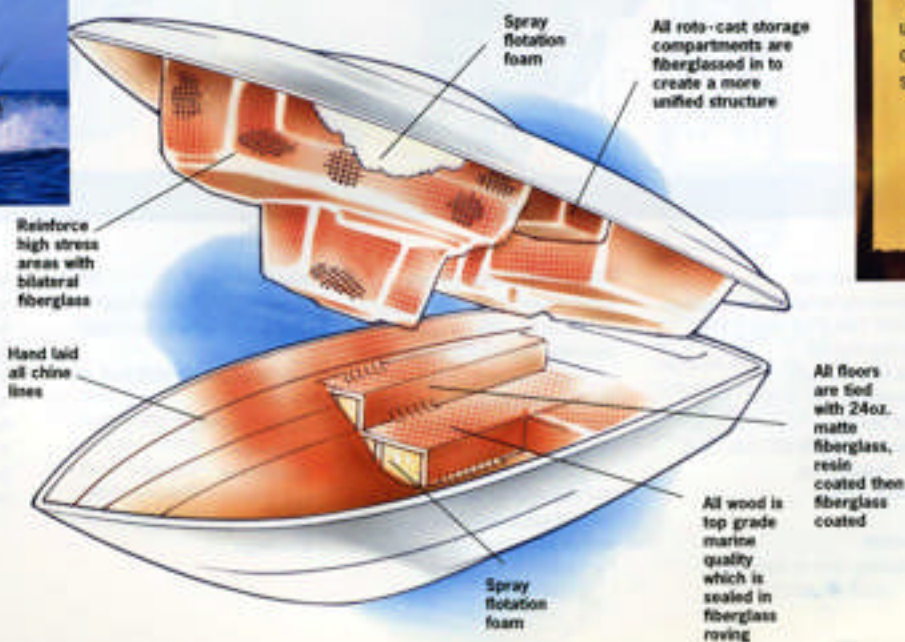

in any way. Considering the punishment you're sure to put it through, every little bit counts. To provide added strength and durability, we secure every kick panel with two-part epoxy rather than screws or bolts. And to assemble the deck and hull, we use a combination of bonding sealant, through screws and bolts. Finally, you ride with the assurance that the roto-cast fuel tanks, which are double-vented

for safety, are tested before and after installation.

We could sit here all day counting the ways a Starcraft is better, but isn't it just nice to know we've taken the time to consider everything? To design a boat with enough forethought to integrate features like a recessed swim ladder and a built-in fishing seat base? To build a boat with an attention to detail, no matter how small? We thought so. Go ahead. Get out on the water. And make your own waves in a Starcraft.

## When it Comes to Toughness, We Put it All Together.

### WARRANTIES

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up that level of quality construction. Starcraft warrants each fiberglass hull for 5 years. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

## 2200/2000 LX & LXS Series

### Open Bow

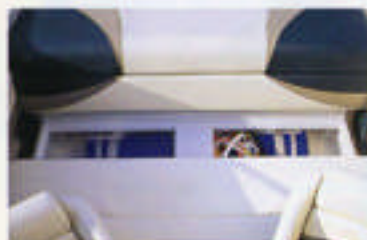

The LX series was inspired by weekends spent turning your nose up to the world, throttling hard across the open water and never looking back. Wake up. This is your invitation to get out on the water and play as hard as you work. It's your chance to strap into a pair of skis, give a thumbs up and hold on for the ride of your life. Consider the LX's revolutionary NexGen Instrument panel, low maintenance fiberglass liners, an improved recessed swim ladder, deluxe

Deluxe color-coordinated console with NexGen electronic gauge cluster

Entertainment center with sink

All storage under rear roto-cast bench

upholstery and foam seating, and bonded fiberglass footwells under console. Count on it. The LX Series will get you out to the sun.

## GT Series

Sure it's racy. Bright. And built for speed. It's a GT. And we've equipped this screamer with the kind of features our competitors only offer as options. But is it the boat you're looking for? Well, in the past two years, we've spent millions in product development to make sure it's everything you want. So go ahead. Strap into a wakeboard, and sail over the rise. We think you'll agree there's no better way to pop out of the hole. If that's not enough, consider its sporty instrument panel, stylish graphics and optional Corsa Silent Choice thru-hull exhaust for the kind of rumbling only a muscle boat can let out.

## Fish & Ski Series

Before the sun even rises, you head out to fish. Simple. Just remove the bow cushions, insert the fishing chair and throttle away. After four hours and 20 bluegill, you can return to the dock and grab the family for an afternoon of skiing. It's that easy. All components can be stored inside the boat in case you want to switch gears out on the water. Some competitors don't provide enough

storage, which means you have to go back to the dock to get the equipment for the changeover. On the 1809, you'll find a low maintenance fiberglass liner and self-bailing cockpit. All boats feature side rod storage (locking rod box on the 1809), livewells and a wide beam for increased cockpit space. The Fish & Ski series is a truly convertible boat the whole family can enjoy.

## 1700 Runabout Series

THEY SKI.

If you're looking to buy a boat to get out on the water, but want to have enough money left over to buy the kinds of toys to help you enjoy your time while you're out there, the 1700 Series is perfect. It offers a lot of bang for your money and features everything you need to get started skiing, tubing, or whatever else you want to do out on the water. With an open-bow layout, plenty of in-floor storage to hold your skis, an integrated swim platform with ladder, and adjustable back-to-back seats, the 1700 Series can get you and your family out to the sun.

## Aurora Series

Consider a boat that *Motorboating* and *Sailing* magazine features in its "Boats of Summer" article and claims, "[The Aurora Series] is loaded with features that are unusual on a deckboat." Whether you want to fish, ski or just cruise around, you can choose a boat that best meets your needs. With its unique layout that can comfortably accommodate your entire family, a di-hedral performance hull, a lockable Porta Potti® with room for storage, a deluxe dash panel and instrumentation, as well as generous storage bays, the Aurora can be best described as water's only sport utility vessel. Consider any other deckboat, and you'll end up all wet.

Porta Potti®

# IT TAKES THREE GENERATIONS

In 95 years, we've grown up on the water. Learned to fish and ski. Discovered a world beyond the stumpfields. And become an innovator in the boating industry. So, whether you're looking for a pontoon to help guide you through the currents, eddies and crannies of inland waters, or just get you down the channel and onto the lake, you'll have the confidence of a pontoon built with nearly a century of ingenuity.

You see, when it comes to designing and building a pontoon you

and your family will enjoy, we're always looking for ways to make them better. In fact, some say our engineers are a bit obsessive when it comes to the finer details of building a highly functional pontoon. Even when it means integrating unique features in places you can't see, like below the deck. For example, you'll find our decks are secured with nine elevator bolts along each seam. Compared to the others, who've been known to use only five or six, our deck is more stable. Something we think you'll appreciate after years of pleasure

## Fencing

Anodized, extruded aluminum fence railing won't oxidize or discolor, and features tig- instead of mig-welding, creating a stronger structure. The fence is welded before it's anodized so welds don't turn white from oxidization. Finally, knee braces are bolted on to provide additional support.

## Indirect Floor Lighting

To illuminate the floor for nighttime rides, lighting has been integrated into the furniture on all Elite models.

## Docking Cleats

Rather than having to tie off the boat using the lifting eyes, we incorporate docking cleats into the decking for ease of use.

## Fitted Double Rub Rail

Plywood deck fits into lip of rub rail. It helps keep the deck dry, as well as secures the carpet and protects and reinforces the entire deck, preventing any sagging at the deck edges when entering or exiting the pontoon.

## Carpet

Before the carpet is laid, holes are cut in the deck to keep the carpet from breaking down. We also use 100% roll-on glue for complete adhesion, as opposed to spray-on glue used by competitors which does not seal as well.

## LockOut® Sealant Tape

To eliminate risk of dryrot or warping, special sealant tape is placed on every Z-bar cross member to completely seal the decking. Unlike silicone, which reacts poorly with salt water, LockOut Sealant Tape provides years of trouble-free service by maintaining a dry deck.

## Insulated Fence Panels

To eliminate any rattles from the fencing or rails at running speeds, foam tape is applied wherever the aluminum fencing attaches to the metal frame.

## Nylon Lock Nuts

Used in place of regular star washers, these nylon nuts heat up and seal to the bolt for a stronger bond.

## new for 1999 Elevated Fencing

The fencing has been raised an 1/8" to allow water to drain, minimizing the risk of mildew and allowing the deck to dry in a shorter time frame.

## Trouble-Free Beds

Our beds are the only user-friendly beds in the industry. Unlike competitor's models, our beds are designed so you can easily open them with one hand. In addition, when you want to get a life vest or towel out of the storage compartment, the bed cushion stays open so you don't have to fumble around trying to hold the cushion with one hand while searching with the other. As far as construction goes, each bed is made with one-piece, rather than many, and is roto-cast with drain holes to eliminate the risk of water damage. The bed, like all seating furniture, is made of marine grade foam and UV resistant marine vinyl upholstery, and is channeled to allow air to get in and under seats so they don't mildew. The entire piece is then covered and completely sealed, not just dipped or stained. Finally, all the furniture is assembled off the boat to eliminate the risk of any damage.

# TO BUILD THE PERFECT PONTOON.

or fishing. And above the deck, we've taken the time to fasten our doors with screws rather than pop rivets. We know you may not be able to appreciate this until you've opened and closed the gate a few hundred thousand times, but that's okay. We're just bound and determined

to build the best pontoons on the water. That's why we equip them with more standard features than anyone else on the market. After 95 years on the water, we've come to know what our customers expect when it comes to the kind of equipment they'll need to help them get away from it all on a pontoon.

## Wood vs. Composite vs. Aluminum

### 7-Ply Pressure Treated Plywood

- Insulates against heat
- Costs less money and still carries the same lifetime warranty
- Quieter on the open water
- Lighter weight than most composite materials to improve speed and fuel economy
- Provides necessary flexibility to minimize wear and tear to components

### Composite

- \$800 more expensive than plywood (with same warranty as wood)
- Made with space-age synthetics
- Won't rot or retain water
- Won't warp, delaminate or pollute
- Our optional space age (stealth) composite will not permanently deform over time like some materials, such as Kevlar, used by the competition

### Aluminum

- Very HOT in the HOT HOT sun
- Hard on carpet wear
- Is prone to creaks, rattles and leaks causing water to seep onto the deck and carpet creating mildew
- \$800 more than plywood
- Aluminum is a thinner material creating a weaker platform for optional accessories attached to the floor (like a grill) compared to wood or composites

### new for 1999 Deck Cap with Radius Corners

For a smoother exterior appearance, we've replaced the black corner bumpers on our Classic and Starfish models, 20' and above, with stronger radius caps.

### Underskin Liner

For smoother, more efficient performance for our I/O models (optional on outboard models), the entire length of the boat is lined. This keeps water from splashing against the cross members, and eliminates the "surging" sensation that's created. The liner starts behind the splash fins on the tubes, allowing the pontoon to cruise effortlessly at higher speeds.

### Z-bar Cross Member

The pontoon is securely fastened to a heavy-duty, extruded Z-bar cross member support system, providing more strength and structural stability than conventional hat channels.

### Tubes

Our pressure checked tubes are constructed with two or three baffles (sections), so if a part of the tube is punctured, the entire pontoon won't sink. Each baffle is connected with a 3/4" double wall overlap that's stronger than a conventional butt weld.

### Extruded Aluminum Molding

Strong moldings act as a spray deflectors, as well as provide additional support for the pontoon.

### WaterBoot®

All tables and fishing seats are supported below the deck with a metal bracket. A WaterBoot surrounds that bracket and attaches into the decking so water can't seep into the floor keeping the deck dry.

### NMMA Certification

All pontoons are NMMA certified, which means that all wiring is sealed meeting standards similar to the automotive industry and is secured every 18 inches. Additionally, any metal that comes in contact with the gas tank is sealed.

### Full-Length Keel

Protects the tube, as well as provides steering stability when running.

### WARRANTIES

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up that level of quality construction. Starcraft pontoons carry a lifetime warranty on the deck, tubes and transom. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

## Starfish Series

One minute on deck with a mile of water around you and you'll remember why you wanted to buy a pontoon in the first place. The Starfish is designed to get you and your family out on the water in style. The Starfish features fish and cruise versatility, maintenance-free roto-cast furniture, a layout that sports enough room to seat an entire family and still have

L-group seating with storage

2 aft fishing chairs (240)

Padded aft sundeck and removable table

Livewell

Side front entry with ladder

room to fish up front, raised fencing to allow the deck to drain faster, a pop-up changing room and sunpad (240), a bow gate designed for a trolling motor, as well as 4 fishing positions. This year, why not make a splash on a Starfish.

## Stardeck Classic Series

In fact, we think families will be happy to get out there on the water tubing, skiing or just lounging around. Go ahead and ask them. After all, it is a family decision. Consider the Classic's roto-cast deluxe furniture, changing room, console dashes, raised fences, and radiused corner caps. You'd be surprised what a weekend on the water can do to bring a family closer together. With a Stardeck

Classic, you'll never be landlocked again.

## Elite Series

You want to take midnight cruises. They want to ski and tube. He just wants to fish. Ah, the joy of family life. To help make all this compromise easier, we've designed the Stardeck Elite to be the ideal boat for the whole family. With both outboard and MerCruiser propulsion, you've got enough power to get you and your closest friends screaming across the lake comfortably. Step onto the deck. Watch the tubes settle into the water. And take a seat behind the wheel. It feels good, doesn't it? Consider its fiberglass console NexGen gauge cluster, a fiberglass galley and sink, deluxe roto-cast furniture/chaise lounges, a double rub rail, one-piece pull out beds, an aft sun pad changing room, and floor lighting. Isn't it about time you step up to the Elite?

## Utilities Jon Boats

At Starcraft, we believe many of life's most valuable lessons are learned out on the water. Children learn the ways of the fish. Grown-ups pass on the legacy of the water. We understand the importance our Jon Boats and Utilities play in the lives of the families who use them. That's why we're committed to making them strong and building them to last. With double riveted seams and reinforced hulls and transoms, you can count on every one of our Jons and Utilities to get you out there on the water for years to come. And with so many different sizes and models to choose from, you can be sure you're in the right boat.

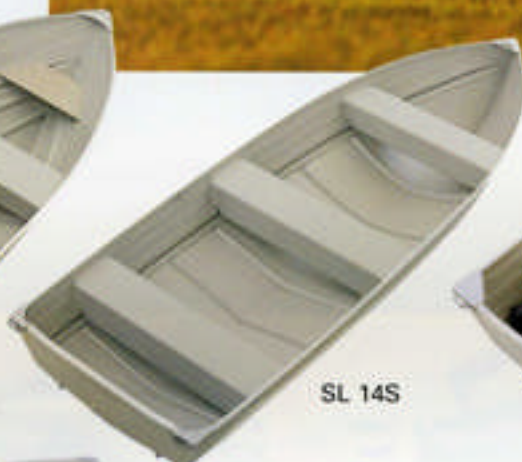

BECAUSE THESE LITTLE SKIPPERS  
ARE JUST CRAZY ABOUT FISH.

At Starcraft Marine, we're building boats with more standard and optional features to help you catch more fish, more waves and more fun. Compare our standard features with the competitors and see for yourself what owning a Starcraft really means. In addition, check out all of these options packages and accessories.

#### JVC CD Player

The optional AM/FM CD player features 4 premium marine grade speakers and provides enhanced stereo sound.

#### Mercury Propulsion

Starcraft boats come standard with a Mercury®, Mariner® or Force® outboard motor or MerCruiser® stern drive with optional horsepower matched to each hull for optimum performance and economy.

#### Fishing Package

One of the optional fishing packages includes a MotorGuide® 765-50° Trolling Motor and a Lowrance® X-65 Depth finder to help you catch more fish.

#### EZ-Loader Trailer

Every Starcraft is loaded and delivered atop an EZ-loader trailer for easy hauling, launching and trailering. All welded trailers feature Goodyear radial tires.

# YOU OUT ON THE WATER.

### Bow Tonneau Cover and Side and Aft Curtain Set

These optional covers are made of heavy-weight or Olefin® canvas made of durable polyester treated to resist water and mildew, and provide quick and easy protection from mother nature, as well as offer an attractive alternative to a traditional mooring cover.

### Corsa Silent Choice Thru-Hull Exhaust

With the flip of a switch, you can reroute the exhaust through either the prop or the hull, depending on just how quiet you want to be.

### Pontoon Camping Enclosure (not pictured)

This full enclosure camper with zipper screens enable you to fully enjoy life out on the water. No matter how long you plan on being out there. Its heavy-weight canvas provides shelter from the storms and is made of durable polyester duck and treated to resist water and mildew.

### Pontoon Mooring Cover

Protect your investment year round with a heavy-weight canvas made of durable polyester duck treated to resist water and mildew.

### Bimini Top, Bow Tonneau Cover and Walk-Through Curtain Set

These optional covers are treated to resist water and mildew and allow you to quickly adapt to the elements, sheltering you from the rain or sun.

### Aluminum Mooring Cover

Every mooring cover is custom fit to each model and is made of a heavy-weight canvas made of durable polyester duck treated to resist water and mildew.

### Vinyl Flooring

The Superfisherman is available with an optional vinyl floor for a maintenance-free deck. When you pull into dock, just hose it out and head home.

# WHEN IT CAME TO THE PERFECT BOAT, SHE MADE THE RIGHT DECISION.

Considering everything that went into building the boat, it wasn't such a tough decision after all. We're your boating company. It's been that way for the last 95 years. And it'll probably be that way for another 95. Think about it. We have the best service with a dealership family that touches nearly

every spot of water from coast to coast. We have the

best warranties with a track record that's nearly a century old to back it up. And we've stood the test of time. Some even say admirably.

Join the family. Get out on the water. And get wet.

## HERE'S WHY

### Tradition of Excellence

Since 1903, we've been first on the water, leading the way for the boating industry by continually introducing revolutionary concepts and innovative designs. In 95 years, we've learned how to build the best boats on the water.

### Engineers, Anglers and Water Fanatics

Our designers, engineers and employees have lived their lives on the water and are the people responsible for changing the marine industry by creating unique features, innovations and, of course, industry lines.

### Warranties

1999 Starcraft models are warranted for defects in material or workmanship. Starcraft warrants each Pro-Elite hull for 15 years, and every other aluminum hull for ten years. Each fiberglass hull is warranted for 5 years, and every portion carries a lifetime warranty on the deck, tubes and transom. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

### Full Product Line

At Starcraft, we build a boat for everybody on the water. Whether you're an avid angler, a weekend warrior, or just enjoy a ride around the lake, you'll find what you're looking for at Starcraft Marine.

### Starcraft Dealership Family

Because we make the best boats on the water, we're careful to choose our dealers for their quality customer service and care. Our dealership family is a national network that stretches coast to coast, which means you're able to find dependable, service, no matter where you are in the country.

**STARCRAFT**
