The independent, family-owned company that builds Starcraft boats today is the same family that built its first metal boat in 1903. That's when the Star Tank Company was started by Arthur Schrock. Under the leadership of an entrepreneurial family, whose members are principal directors and owners of the company, each Starcraft is designed and engineered to provide your family with years of satisfaction and fun.

Early in the 1950's, the Star Tank Co. began to make aluminum boats, using some of the aluminum sheath manufacturing techniques developed...
A Starcraft Story

developed during WWII for the aircraft industry. Soon, the aluminum boats became so popular and sales increased so much that "1956 was the first year boat production continued through the winter," remembers Merle Graybill, certification engineer.

Today Starcraft continues the 94 year history of leadership with a complete line of quality aluminum fishing and recreational boats including pontoons. Also included in their line-up are fiberglass recreational and fishing boats such as bow riders, cuddy cabins, closed bows, deck boats, tournament fishing boats and cruisers. Refer to them in Starcraft's 1997 Pleasure Boat Catalog.

A dinner reservation, dockside... in 1967 the Chieftain-V was a popular aluminum cruiser and was powered by a 120 H.P. I.O. Motor.

Starcraft Marine continues to add to their collection of boating memorabilia with a 12' Starcraft stainless steel utility boat produced in the late 1940's.
The best designed, best engineered and best built boats on the water today are built by Starcraft. In every well-designed line, in each minute detail, Starcraft lives up to its 94 year heritage. Since the beginning in 1903, Starcraft has earned its number one position in the production of aluminum and fiberglass boats.

**Tempered glass and reinforced windshield.**

**Gunwales are covered with 16 oz. marine grade UV resistant carpet for sure footing.**

**Aerated recirculated livewells.**

**Custom ABS, automotive style dash.**

**Four rib interior stringer systems integrated into the transom give the hull more strength and durability for a longer life.**

**Fold down fishing seats with marine grade, UV resistant vinyl, composite frames and pinchless seat hinges.**

**16 oz. marine grade UV resistant carpet.**

**All wood used in floors and deck are 3/4", 7-ply marine grade plywood, pressure treated to fight corrosion and backed by a limited lifetime warranty.**

**The reverse chine hull being assembled here, provides many benefits over the traditional dead water design: more lift with less horsepower, better fuel economy, better planing and more stability at rest.**

**Only the finest .052 H32 marine grade aluminum cored into a Starcraft hull.**

**Heavy-duty transom is built from 1-1/2" 13-ply, marine grade, pressure treated plywood and reinforced to safely accommodate the boat's maximum recommended horsepower.**

**Superfisherman 170.**

**Reverse chine hull puts the boat on plane quicker and ensures more responsive turns.**

**Double rivets in a stronger zig-zag pattern reinforce all heavy stress points.**

**Fuel tank access panel.**

**Complete instrumentation.**

**Circuit breakers.**

**Classic control box.**

**Vinyl inset aluminum rub rail.**

**Looking rod storage port and starboard.**

**Foam is impact-injected between the hull stringers and the floor deck for more hull strength, less noise and level floatation that exceeds industry standards.**
And, while our 1997 models are all new, they share the 94 year Starcraft heritage. You can trust in Starcraft because all our boats are certified by the National Marine Manufacturers Association.

- Marine grade UV resistant vinyl seats with composite frames.
- 16 oz marine grade UV resistant carpet.
- Pinchless seat hinges.
- Complete instrumentation and circuit breakers.
- 6 gauge trolling motor wiring harness.
- 1 1/2" 13-ply pressure treated plywood transom, clad with aluminum.
- Welded channeled chine and keel extensions.

**Starcaster 1600**

- 16 oz. marine grade UV resistant carpet.
- 7' locking rod storage.
- 125 gauge aluminum lids covered with 16 oz. marine grade carpet.
- Alumulated livewell.

**Reverse chine hull construction.**

![Limited lifetime warranty](image)

**10 year prorated hull warranty.**

**10 year prorated deck warranty.**

**5 year 10 year prorated weld riveted hull warranty.**

This is a one-piece 1-1/2" plywood transom which provides increased strength. The "U"-Channel center keel and longitudinal stringers provide a truer running surface for improved performance.

(Starcraft V-Hull and Modified V-Hull boats.)

No one backs a boat the way Starcraft does. Every Starcraft has a ten-year prorated hull warranty and a Mercury®/Mariner®/Force® outboard or a Mercruiser® stern drive limited one year warranty. We give you this warranty so you can spend your time enjoying the water, not sitting on the dock. For full details, see your Starcraft dealer.
Fishing – that’s what Starcraft had in mind when they designed the Superfisherman series. Great fishing boats with all the features you and your family will need. There are five popular models to choose from in lengths from 14’ 6” to 19’.

**Starcraft Deep Vees Are The Best Vees Made**

All feature timers on the livewells, relocatable pedestal fishing chairs, locking rod boxes and storage for all your gear and supplies. Check out these popular models at your Starcraft dealer today.

---

A convertible top and radished walk-thru windshield protect you from the sun and rain.

---

There’s plenty of livewell space to keep your catch fresh, plus an abundance of storage space for all your gear.

---

A built-in tackle tray makes it easy to select the right lure - 170 & 190.
Superfisherman Series

Superfisherman 170

Fishing Tip:
When trolling for soft-mouthed salmon, trout and steelhead, don’t set the hook after a fish grabs your lure. It will usually hook itself. Fish with harder mouths like stripers, walleye, pike and musky; on the other hand, may need a good jerk of the rod to ensure a solid hook-up.

Dale Sprague, Team Starcraft
The Tournament Series from Starcraft are true championship caliber fishing boats. The Tournament 170 and 180 have earned their praise on the professional walleye circuit as the best walleye boat on the market. Each model has a high performance hull that will get you to where you are headed, fast. The Tournament Series is loaded with features designed for the serious fisherman.

Features include aerated livewells, relocatable fishing chairs and lockable rod storage. A custom color-coordinated trailer makes the Tournament package complete.

The Tournament 180 features a livewell and cooler on both the port and starboard sides.

The Tournament Series has a locking rod storage compartment that keeps your rods conveniently stored.

Cast comfortably from the bow platform in the composite fishing chair.

Fishing Tip:
When transporting walleyes to a tournament weigh-in or a cleaning table on a hot day, the fish will stay fresher if the livewell water is cold. Plastic milk jugs and soda bottles filled with water and frozen provide economical, convenient and reusable ice packs.

### Fishing Tip:

Possibly the biggest myth concerning walleyes is that light hurts their eyes and they are, therefore, a deep water fish. Pros in the know often find walleyes on bright, sunny days; feeding in extremely shallow water where they’ll readily hit jigs, crankbaits and spoons. Generally speaking, shallow walleyes are active feeders, so when you find them shallow, expect plenty of action.

Dale Sprague, Team Starcraft
When you're looking for a bass boat, you want more than just a fishing boat – you want a Starcaster. There are three great models from 16' to 18' in length to choose from. Each comes with the best fishing features available including aerated livwells, lockable rod storage, gear storage and more. The Starcasters are built on a computer designed, reverse chine, high performance hull that planes fast and tracks positively through turns. All three of these popular priced models have matching custom trailers that are a truly handsome package.

**Fishing Tip:**

In most environments, bass are ambush feeders, often lurking around weeds, wood, rocks and man-made structures, waiting for food to swim by. Precision casts that bring your lure by these hiding places can lead to consistent success. If a minnow-imitator doesn't work in a particularly good-looking place, try a lure that imitates a crayfish, a bass's other favorite food.
Ninety four years ago, when we built our first metal row boat, we started a tradition of building quality boats with real value. Today, you'll see that same tradition continues in the Fishmaster Series. The Fishmasters are deep V, rugged fishing boats that meet the needs of all types of fishermen. The Fishmaster line-up offers a variety of Tough, Durable, Serious Fishing Boats models from 14' to 19' and, for 1997, even a 19' center console for the seasoned fisherman.

Take chance behind the helm with complete instrumentation. Note the high quality, raised wire shield on both the Fishmaster 170 and 190.

Fishing Tip: A wise angler once said, 'A fishing trip is a failure as long as you learn something. Days with fish can be your best teacher if you use the experience to vary your technique and look for fish in other locations the next time you go fishing and face similar conditions.'

Scott Fairburn, Team Starcraft

Starcraft's Fishmaster Series offers a perfect choice in a fishing boat for beginning or seasoned fishermen.

The Fishmaster 170 and 190 provide ample rod storage.

Fishmaster Series

Fishing Tip:

Largemouth and smallmouth bass in heavily-fished waters will often take smaller lures while ignoring large baits on heavy tackle. Down-sizing spinners, crankbaits and soft plastics with lighter line and more limber rods can produce more action on pressured lakes and rivers.
The interior surface of each Fishmaster is top quality, marine grade vinyl that is easy to clean and maintain. Each model comes with standard features such as aerated livewell, marine grade carpet and vinyl, 3/4" 7-ply pressure treated floor and deck, 10-year prorated structural warranty and more. No matter which Fishmaster model you choose, it's good to know that a matching trailer will be a dependable companion to your boat for a lot of fun fishing trips to come.

Starcraft Makes Sure You Get More Value —
Fishmaster Series

Fishmaster 170 and 190

Fishmaster 170
Fishmaster 190
Fishmaster 190 CC
If you and your crew are after big fish on bigger water, you need to check out the Starcraft Islanders. The well-planned Islanders feature twin seats forward and removable stern jump seats. There is a large V-berth in the cabin and, for added weather protection, a stand-up convertible top.

The Islanders — Exceptional Deep Vee Cuddys For Big Water.

The Islanders feature large aerated livewells, tackle storage units, Lowrance X-25 fishfinders plus storage space galore. The large built-in fuel tanks will let you cruise all day long.

Fishing Tip:
When trolling for salmon and trout, use a water temperature gauge to find pods of warm water in early spring, cooler water during summer and fall. Trolling the area where the temperature changes will often present your lures to fish that other anglers have overlooked.

*Boat And Standard Engine Only*

### Fishing Tip:

*The same crankbait will run at different depths when used with different line strength.* A lure that dives 20 feet with eight-pound test may only dive 12 feet with thicker 17-pound test. Keep this in mind when probing deep areas with hardbody lures.

---

**Dale Sprouse, Team Starcraft**

---
The set-up means everything in a multi-purpose pontoon boat like Starcraft’s Starfish. For fishing, the Starfish is set-up with pedestal seats, a large aerated livewell, plus a Lowrance® fishfinder.

**Fish Or Cruise – Starcraft Gives You The Choice . . .**

For family and friends who would rather cruise than fish, the Starfish features plush upholstered seating, beverage holders and a dinette table. On the Starfish 200 Classic and Elite pontoons, there’s even a changing room. Additional amenities include an AM/FM stereo cassette and a stow-away boarding ladder. All three models have a rain and sun resistant bimini top.

**For those who would rather cruise than fish, the Starfish features plush upholstered seating, beverage holders and a dinette table.**

---

Command your Starfish from the console that includes complete instrumentation.

The two-way seat on the 180 is also home to an aerated livewell.

“**You had to have been there, it was this big.”**

The Starfish 200 Classic and 200 Elite are built with Rotocast® seat frames that will not deteriorate from the weather.

Fishing Tip:

When you anchor on that panfish hotspot, a second, smaller anchor dropped off the stern will keep the wind from spinning you around and keep your bobbins in front of you. Always lower anchors gently into the water to avoid spooking the fish.
It was in 1903 that we got our start in building quality boats. We built them strong then and we build them strong today. From a 12 foot utility, a wide camp model to a husky, 18 foot, modified V jon boat, you'll find a Starcraft model suited to your needs.

Many a story has been written about a boy and his boat. This is a hand painted retouched photograph used for advertising. Circa the late 1940's.

Fishing Tip:
When catching catfish, walleyes or panfish for a fish fry, keeping the fish cold will preserve that fresh fish flavor. On hot days, it's better to put fish destined for the table in a cooler with ice than on a stringer or in a fish basket that soaks in warm lake water.

[Table]
Starcraft Cares About Performance And The Environment...

At Starcraft Marine, we believe everyone should play a part in preserving the quality of our air and water. That's why we incorporate our commitment to the environment into every aspect of our work—from designing to building every Starcraft we make. We hope you'll share in our commitment to taking care of our environment. After all, we're in it together.

Most Starcraft boats come standard with a Mercury®, Mariner® or Force® outboard motor, or MerCruiser® stern drive with standard and optional horsepower, matched to each hull for optimum performance and economy.

The MerCruiser® 3.0 LX, 4.3 LX and 5.7 litre stern drives use a GM Power-Train 4-cylinder, V-6, or V-8 engine respectively, as its power source for the most efficient combination of what every boat owner wants in an engine: power, economy and dependability.

In the interest of developing the finest products available, Starcraft reserves the right to change product specifications without notice. All representations of this catalog are believed to be correct at the time of publication. Optional equipment may be shown in some photographs.

Optional canvas is available for Starcraft pontoons through TUMACS Covers, 59 Terence Drive, Pittsburgh, PA 15236. Phone: 1-800-248-8602. Fax: (412) 653-4870.
