FOR 95 YEARS, PEOPLE WHO LOVE
BOATING HAVE COUNTED ON STARCRAFT.

Founded in 1903 as the Star Tank Company, Starcraft has become a legend to generations of boaters.

Today, as an independent company, Starcraft is “Redefining the Legend.” Starcraft offers an incredible
selection of outstanding boats for just about any family’s needs and budget. From our new Pro-Elite Series,
GT Series, LX Series and Expedition Series to our redesigned pontoons, you’ll find Starcraft leading the way.

You will also find our field proven products, like the Superfisherman, Fishmaster, Utilities and fiberglass
runabouts, continue to provide great value for the boating experience. See the new 1998 Starcraft line-up
today and find out what legends are made of.
STAR CRAFT FISHING BOATS

REDEFINING THE LEGEND

With a mixture of dramatic new models and welcome designs of longtime favorites, it's readily apparent Starcraft is not only "Redefining the Legend" but redefining the fishing boat industry as well.

One glance at the magnificent Pro-Ellinos, with their massive array of fishing features, tell you this is already the fishing boat of the 21st Century. Designed for serious big water fishing, these tournament-style, deep-V powerhouses are the longest, widest and deepest boats in their class. The Pro-Ellino feature wide beams (a whopping 102" on the 2000), enormous (17" deep) padded center console, an onboard battery charger, true dry storage, serated heelrails and a seemingly endless list of standards that will strike the bowfishing anglers everywhere. To show our faith in these fishing machines, we're backing them up with an amazing 15-year warranty.

We're not stopping there, either. Our popular Islanders, already well known and respected among offshore fishing fans, have been renamed to become better than ever. Plus, we've introducing two new tournament-class twenty-footers, including an 18-foot model. Both the Superfisherman and Fishmaster Series, loved by anglers for years, are even more fish-functional than before.

Even with a stellar lineup of angled aluminum fishing boats, we haven't forgotten those who prefer the strength of a fiberglass hull pounding through the waves in search of fish. Our Tournament Pro Series is built with a composite stringer system and a full glass liner floor for easy maintenance. Inside, it provides the wealth of professional features that will thrill anyone who enjoys serious fishing. In fact, those features are why the Tournament Pro is the official boat of the North American Walleye Anglers.

Throughout our fishing boat lineup, we build boats that will stand up to the roughest conditions for years to come. In our aluminum boats, the Toriessian Advantage stringer system, custom built for each hull, provides exceptional shock absorption along with a properly shaped running surface for excellent performance. All floors in our aluminum boats are made with 3/4" 7-ply pressure treated wood, giving you years of solid support, and sandwich injected foam increases the floor's strength while reducing noise and vibration. Double riveting gives our boats both the strength and flexibility to withstand the inshore chop. And, the scratch resistant heat-cured urethane finish keeps your boat looking its best year after year.

Inside, our composite seats are wrapped in UV-resistant vinyl, so they keep their brand new look for years, and pinless seat hanger protect your fingers. Plus, we're using H-31 seat hardware, which meets the American Boat and Yacht Council standard for boat safety, passing impact tests similar to the automobile industry's bumper impact tests.

So, whether you desire the challenge of big water fishing, or prefer the simple pleasures of a quiet lake; whether your fishing adventures require all the professional features you can find, or whether a cabin-topper suits you just fine, you'll find Starcraft has exactly the right boat for you.

Starcraft fishing boats truly let you enjoy "life in the fast lane".
When porsche through tough waters, you'll appreciate the superb strength of your Starcraft aluminum boat. Longitudinal stringer studs, the Torado Beam Construction stringer system and the transverse box ribs create a rock-solid foundation that can easily take whatever Mother Nature throws your way.

Starcraft uses 5052-H32 marine grade aluminum alloy because it offers the greatest tensile strength and the greatest corrosion resistance.

You'll enjoy years of solid support, thanks to the 3/4" 7-ply pressure treated wood floors found in every Starcraft aluminum boat. The wood won't warp or rot, reducing any maintenance worries. Once the floor is installed, we inject sandiatrics from underneath the floor. This fills all air pockets to prevent water from seeping in, and also acts as a sound deadener while strengthening the floor and hull.

To give your boat the best combination of flexibility and strength, we use aircraft-style double riveting. This produces a boat that will hold together far longer than welded boats, and that can withstand the punishment of the meanest waters with flexible ease.

All aluminum surfaces are sand blasted and chemically cleaned prior to painting, ensuring better paint adhesion and corrosion resistance. The paint is heat cured urethane, which is scratch resistant and gives the hull of your aluminum boat a bright glossy look that lasts for years.

All Starcraft boats are certified by the National Marine Manufacturers Association and meet or exceed U.S. Coast Guard standards.
FEATURES AND BENEFITS

Spotting fish is never a problem in your Starcraft, since many models feature elevated casting platforms. In the Pro-Elite 2000, the spacious bow area includes an enormous 50-gallons livewell and several storage compartments, including a true dry storage area. The power air-ride pedestal seat easily adjusts up and down to comfortably accommodate any angler.

Fishing boats require excellent rod storage, and Starcraft fishing boats easily meet that requirement. Many models have both port and starboard rod storage compartments, and most are lockable to keep your gear secure. In the Pro-Elite, one door folds down, leaving you room to place equipment on the top door, which lifts up when you're ready to pull your rods out.

You can take charge of the lake, and your Pro-Elite, with this boat electronics command center. It features an engine trim switch, plus livewell and baitwell fill switches. An additional switch and indicator gauge lets you quickly monitor the condition of your batteries. You'll also find plugs for the trolling motor and battery charger, along with a 12 volt accessory plug. The lockable storage compartment is a handy place to store those accessories.

When you're out on your Pro-Elite, the fish won't be able to outlast your battery power. That's because one of the many benefits of owning the fishing boat of the 21st Century is the on-board trolling motor battery charger system. You'll be able to keep your batteries fresh, plus you've got room to store three batteries.

Starcraft fishing boats are designed to combine convenience with functionality. The starboard aft in the Pro-Elite 2000 includes a large storage area with a flip-out cooler, along with a switch panel to operate the rear livewell and baitwell. There's also a gas tank switch that allows you to switch from your main tank to the 5-gallon reserve tank.
You may know where the fish are, but you still need some bait to catch 'em. In the Pro-Elites, you'll find two Robo-Cast baitwells, one in the bow and one aft. Both two-gallon units are aerated, so your bait will stay as fresh as your catch.

Throughout Starcraft's fishing boats, you'll find a generous amount of storage room for all your gear, large and small. On the Islander 2001, for example, this padded seat back easily pulls out to provide you with a handy little storage compartment.

You can see how efficiently the console area of the Islander 2001 is designed. There's a fixed, Robo-Cast seat with storage underneath, and pick-up footrest for the captain. The gauges are all easy to read, and the stereo has a protective cover. Even when open, the cabin door is out of the way, and the radius windshield gives you a clear view of the fish.

You'll enjoy superb handling, stability, and cornering plus faster planning with Starcraft's Power-Tour hull. This hull features a reverse chine that runs the full length of the boat, and channels water entry from the bow for a dry ride. We take special care to ensure the rabbets along the chine are straight, providing you with true performance.

To simplify your fishing life, we've moved the trolling motor plug on our bass boats off to the side. This makes installing and operating your trolling motor easier and more convenient.
TOURNAMENT PRO SERIES

TOURNAMENT PRO SERIES STANDARDS:
- Battery Hold Down
- Stainless Steel Bow & Stern Eyes
- 4 Mooring Cleats
- 38 Gal. Fuel Tank - Double Ventilated
- Internally Ventilated Fuel Fill
- Fuel Tank Access Panel
- Full Fiberglass Liner
- Fiberglass Lids
- Composite Stringer System (No Wood)
- Barrier Coating Hull Sides & Deck
- Thru-Hull Bilge to Hull
- 2 Fishing Chairs
- Pinchless Seat Hinges
- 4 Pedestal Locations (3 in 180)
- Bow Panel w/Flag, Tilt Switch & Aerator Switch
- 7 Locking Rod Box
- Bow Storage
- Port & Starboard Side Grab Handles
- Art Mounted Trolling Rod Holders
- Deluxe Sport Wheel
- 2 Air Acoustical, Recirculated Livewells
- Flow Eater Valve Systems
- Art Mounted Baitwell
- Bilge Pump
- Navigation Lights
- Courtesy Light
- Circuit Breakers
- Trolling Motor Plug & Receptacle
- No Feed Back (Rack & Pinion) Steering

TOURNAMENT PRO SERIES OPTIONS:
- Color Coordinated Snap-In Carpet

TOURNAMENT PRO 180 EXTRA STANDARDS:
- 10 Gal. Built-In Fuel Tank and Stepped Transom for Kicker Motor
- Port & Starboard Built-In Insulated Coolers
- Port & Starboard Console Storage Shelves
- Beverage Holders
- Deluxe Sport Wheel
- Fixed Console Seams w/Storage
- Windscreen
- Center Box

REDEFINING THE LEGEND

In fiberglass, "Redefining the Legend" means providing new excitement for thrill seekers and deep water adventurers alike.

The GT Series offers the young at heart exhilarating performance and awe-inspiring graphics. Inside, you'll find plenty of leg room with molded inserts under the consoles and a full-width rear bench seat and padded sundeck for laid-back enjoyment. Open bow models include a glass liner/roof for easy maintenance.

Family runabout fans will enjoy the luxury found in the LX Series. Soft colors, rear jump seats and adjustable back-to-back seats help make the boating life a relaxing one. An optional design plan allows the open bow LX models to come equipped with bucket seats and a rear bench seat.

For those who prefer offshore fishing excitement, Starcraft introduces the Expedition Series, which includes both Walk-Around and Center Console models. Massive fish boxes, insulated storage compartments, sturdy rod holders, composite stringers, a tremendous amount of fish-fighting room and much more will make big water fishing an experience well worth taking.

We haven't forgotten those of you who like to combine the best of both boating worlds. Our Fish & Ski models allow you to take family and friends to your favorite fishing hole to catch a few trophies. When the fish stop biting, you can pull your crew on a few high-powered slalom runs around the lake.

And, every Starcraft fiberglass boat is built to last. Multiple layers of woven roving, state-of-the-art Euro-style consoles and more, combine to give you a boat that will provide years of superior performance. Packed with superb features like those you see here, 1998 promises more legendary excitement for you...

from Starcraft.

A Spraying barrier coat is applied to the sidewalls allowing more strength and rigidity with less weight, eliminating hot spots during laminisation, for an improved finish.

Applying the first layer of bidirectional fiberglass assures elimination pattern knot-through from the woven roving.

The floor is drilled and foam is injected for flotation and noise reduction. The holes are sealed over to provide a more rigid, water tight and quiet hull for optimum performance.

Woven roving is laminated and rolled to eliminate air pockets. This provides a long lasting, top quality finish and added strength and durability.

Each boat's stringers are fully encapsulated to eliminate water intrusion that causes dry rot.

After it has been thoroughly prepared and inspected, the mold receives the first layer of the highest quality gelcoat and resins available.

Each hull is treated with two layers of 24 oz., kentzel woven roving on the running surface. Others and keel receive an additional 8 oz. wide reinforcing strip of woven roving to improve strength and reduce flex and cracking.

Certified

All Starcraft boats are certified by the National Marine Manufacturers Association and meet or exceed U.S. Coast Guard standards.
While you're working on your taxes, the small top stores neatly away under the deck, where you can quickly pull it out when you want a little shade. The storage area contains no sound, providing years of easy maintenance.

The 1980 Exposition helps provide a padded seating area, 40 qt. cooler, two winch rollers and storage under the seat. Remove the optional seat back and you have two more coolers.

The Expeditions are designed for serious fishing, as shown by the spacious bow area of the 2280. This semi-v-hull front dock includes a huge fish well and two large storage areas (all insulated), plus padded combing panels, surrounded by stainless steel walled bow rails.

The Expeditions are designed for serious fishing, as shown by the spacious bow area of the 2280. The semiv-hull front dock includes a huge fish well and two large storage areas (all insulated), plus padded combing panels, surrounded by stainless steel walled bow rails.

Once you've out on the water, getting into the water is easy with the recessed swim ladder found on many models. The non-skid cover is part of the integrated swim platform, keeping the ladder hidden when not in use and allowing full use of the platform when you're swimming or diving.

The Expeditions are designed for serious fishing, as shown by the spacious bow area of the 2280. The semi-v-hull front dock includes a huge fish well and two large storage areas (all insulated), plus padded combing panels, surrounded by stainless steel walled bow rails.

We designed your Starcraft to provide you with hours of enjoyment each time you take it on the water. For example, the Starcraft 2205 cockpit area features a fiberglass hood for your comfort. A built-in sink allows you to grab a cool drink of water, and your glasses stay safe in the nearby cupholders. Under the sink is a 40 qt. cooler, for your favorite picnic supplies.

In the 2280 Expedition, a padded seat in front of the console also acts as a Port-a-Seat, allowing you to fish comfortably all day long.

The Expeditions are designed for serious fishing, as shown by the spacious bow area of the 2280. This semi-v-hull front dock includes a huge fish well and two large storage areas (all insulated), plus padded combing panels, surrounded by stainless steel walled bow rails.

A standard Port-a-Seat is designed to fit into the passenger side console base of the 2210 LS.

When you're fishing, you're fishing for a star. Your Starcraft Fish & Ski, the original coffeemaker, will keep your coffee fresh. The 1980 Fish & Ski has been voted the best boat at the show, and is now a best seller.

If you like the feel of carpet under your feet, the optional carpet or glass liner boats are easy to install. Instead of tedious-screwing button strips, Velcro® strips make placing carpet in your Starcraft a very simple process.

1701
"Redefining the Legend" in our pontoons means increasing your comfort. Luxurious new furniture, redesigned consoles, color-coordinated carpet and new cocktail tables are just the start of the enjoyable amenities you'll find in Starcraft pontoons. We're also providing you with a remarkable variety of models to choose from, including several I.C. models, with something for every boating family.

The Stardeck Elite models exemplify class with grace and style. Spacious L-shaped front and rear lounge seating, helm chairs and padded sun decks let you relax and enjoy the sunshine. Built-in coolers, side and tables make any spot on the lake a picnic spot, and the color-coordinated teak top provides plenty of shade. The curved front decks and panels provide a sleek, streamlined appearance, and the optional composite floor is wind free.

Relaxation also defines the Stardeck Classics. Plenty of room for a full crew of family and friends, lots of seating, padded sun decks and your favorite tunes on the stereo help make any outing a pleasure cruise. Pack your favorite refreshments in the cooler and pack all your good time gear in the ample storage areas, and you're set for a full day of enjoyment.

If you like to mix a little fishing while enjoying the comforts of your pontoon, then try a Starfish. Fishing seats and livewells combine with a variety of relaxing amenities to offer you and your crew plenty of memory-making voyages.

Starcraft pontoons are built to go on many voyages. Welded pontoon tubes with separate bulkheads for better flotation, long lasting support from floors made with 3/4" 7-ply pressure treated plywood and sturdy durable transoms are just a few of the solid construction features making your Starcraft pontoons a delight to own for years to come. And, to backup our construction, we're providing limited lifetime warranties on the decks, transoms and tubes for your piece of mind.

For relaxing pontoon pleasure that's truly legendary, climb aboard a Starcraft pontoon.
The spacious rear lounge area in the 240 Elite demonstrates why Starcraft pontoons are made for entertaining. A curved L-shaped bench seat provides plenty of sitting-out room and the swivel barrel chairs are very comfortable. The removeable fiberglass cocktail table makes a handy picnic area and the padded sunpad is a great place to enjoy the scenery. An extra wide helm seat means plenty of room for the captain, and even the first mate.

For greater enjoyment, all Starcraft pontoons currently have been redesigned for 1998. The ABC deck in the Stardeck 240 Elite features a Prestige 7200 in-deck depth finder, spot light, stereo system, a 12-volt accessory panel, and with a fresh water pump, full instrumentation and more.

Storage, storage, storage; You'll find plenty of storage room for all your fun-to-the-sun gear throughout your Starcraft pontoon, including the areas of the choice lounge. Take full the flip out side and you've got room for storing guns, suntan lotion, magazines and more.

If you need even more room to relax, or to enjoy an afternoon nap, the front lounge on your Stardeck Elite quickly turns into a comfortable "water" bed.

Accessing the engine is easy. Your Starcraft BO pontons is easy. The center panel of the padded sunpad lifts up to display a large, carpeted storage area. A hinged floor in the compartment slides back allowing you to check on the engine and perform any routine adjustments.

Pack a lunch along with your favorite refreshments. This convenient cooler in the Classics space easily under the console so it's out of the way, yet right there when it's time for a break.

Designated convenience is everywhere you look in a Starcraft pontoon. Placing beverage holders where they're always within easy reach is just one of the many thoughtful touches you'll find in your Starcraft.

Take all day to stay and play. Your Starcraft pontoons is made for entertaining, as shown by the boast of the Stardeck 240 Classics. A relaxing bench seat, two comfortable barrel chairs and a redesigned cocktail table provide a rear spot to socialize with your friends.

All Starcraft boats are certified by the National Marine Manufacturers Association and meet or exceed U.S. Coast Guard standards.

WARRANTIES • CLOTHING • TRAILERS • MOTORS

STARCRAFT 1998 LIMITED WARRANTY

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up our quality construction. Starcraft warrants each Pro-Elite aluminum hull for fifteen (15) years, all other aluminum riveted hulls for ten (10) years, and all fiberglass boats for five (5) years. Starcraft pontoons carry a lifetime warranty on the deck, tubes and transom. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

Starcraft boats are packaged with sturdy, dependable trailers, including EZ Loader trailers on some models, providing more value to you. The frames are welded for extra strength, and the wheels include transom tie downs, carpeted banks, painted wheels and submersible lights.

Most Starcraft boats come standard with a Mercury®, MerCruiser® or Force® outboard motor or MerCruiser® stern drive with standard and optional horsepower matched to each hull for optimum performance and economy.

Look sharp while jobbing your Starcraft boat with official Starcraft clothing. Just call 1-800-237-3548 ext. 483 to make your selection.
