EVERY DETAIL SETS US APART.

Starcraft fiberglass boats are painstakingly constructed to the most exacting standards. Learn more about the elements that add up to industry-leading quality.

- Integrated stringer system provides unmatched strength and durability. All components are encapsulated in fiberglass, and on all OB models the stringers are completely composite.
- Blister-guard barrier protects your boat from the elements and prevents gel coat blistering.
- Ten coats of wax are applied to the molds for consistent part quality. Layered 24 oz. woven roving power weave fiberglass mat is used with a 6-inch overlap between the hull and deck for enhanced strength and a tight fit. Next is the application of 22 ml of high luster gel coat and, finally, each hull is inspected and weighed for consistency.
- 22 ml ISO-NPG Gel Coat
- 24 oz. Power Weave Mat
- 60 ml of Fiberglass Mat
- 2 ml Coremat
- 18 oz. Bi-Axial Fiberglass
- Blister-Guard Barrier Coat
